

LONG-RANGE FACILITIES PLANNING

The board recognizes that sound planning based on accurate information is essential to the efficient operation of the schools. In order to ensure that future district construction/alterations/remodeling is planned on the basis of need, the board, in accordance with state requirements, will prepare the required long-range facilities plan and will update that plan as required thereafter. The plan shall include a thorough description and analysis of local and regional demographic factors that influence general population growth and public school enrollments.

In order to apprise the board of the continuing relevance of the capital construction plan, the chief school administrator shall report to the board:

- A. Number of new residential units approved;
- B. Enrollment by grades during the school year monthly;
- C. Pupil population projections prepared every year, and compare the actual population figures to the previously projected figures to detect early, for the benefit of the board, any changes in population trends.

In planning for the enlargement or modification of its facilities, the board shall consider not only the number of children whose educational needs must be met, but also the physical requirements of the program it deems best suited to meet those needs. Each school building and site shall provide suitable accommodations to carry out the educational program of the school including provision for the disabled, pursuant to law and regulation.

Planning for major rehabilitation and remodeling will be incorporated into the school district master plan on a scheduled basis.

Substandard Facilities

All existing school facilities will be evaluated annually for their suitability to current district needs. Any facilities found to be substandard according to the administrative code shall be corrected as quickly as possible in compliance with law.
