December 1, 2025

Dear Kindergarten Families,

Thank you to the families who participated in October and/or November's **Let Grow Challenge!**

October's Independence Goal: State first and last name, home address, and a safe adult's name and phone number when asked.

November's Independence Goal: Independently follow routines within home-school and school-home transitions and expressing gratitude.

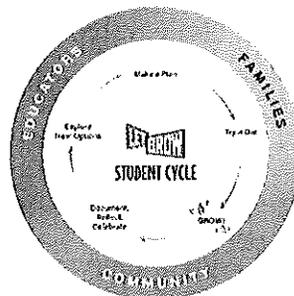

December's Independence Goal is focusing on mastering self-help skills. A weekly homework chart will help guide families to support growth in select self-help skills but the goal is your child's independence! If your child can not do them, guide them towards independence and if they can, push them to the next skill to help them, help themselves, independently.

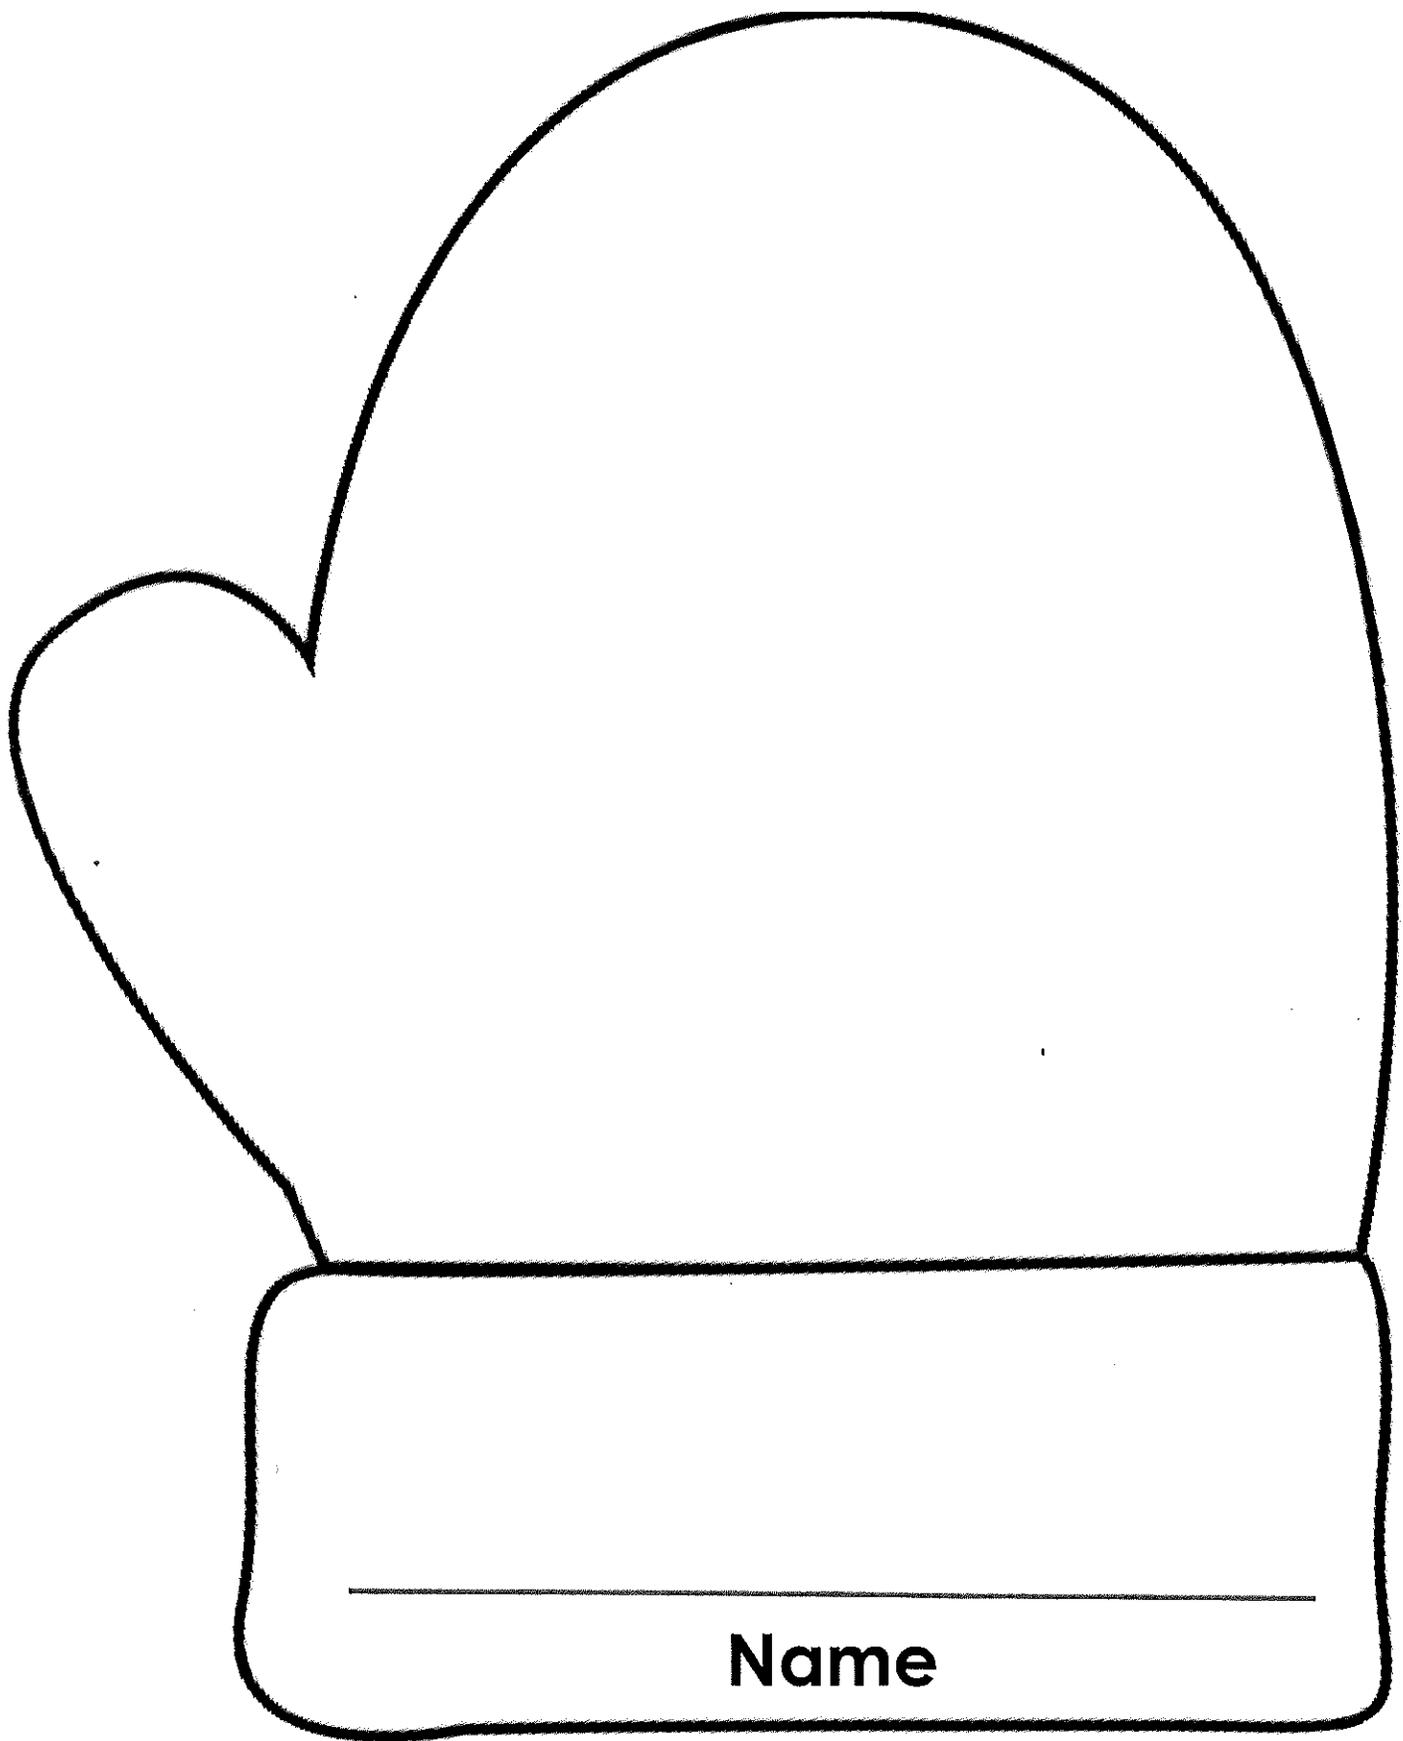

Upon mastering a task with independence, your child can complete the mitten template by illustrating what they are now able to do independently and return to school no later than December 18th.

If you choose to participate, the goal is for your child to incorporate the activity into their daily routine—giving them the freedom to grow without interruption, as championed by **LetGrow.org**.

Thank you for your continued support. We look forward to celebrating your child's achievement!

Megan Caughey
Supervisor of Elementary Education

This is for your child to complete with minimal assistance!

Write your name on the line. Choose a skill to practice this month. Draw yourself completing that task once you have mastered it. Cut out the mitten and return to school by Dec. 18!
