## **History and Digital Citizenship in Film Editing**

### **I. Introduction/Overview/Philosophy**

The digital age has transformed social studies education, allowing 21<sup>st</sup> century learners to transcend the limits of time and place and experience historic events virtually. In this course, students will explore the art and science of film editing, using digital editing software as a backdrop of understanding key historical and cultural events. The students will be introduced to different kinds of techniques and their impact on the look and feel of films including cuts, transitions, and shots. They will also learn about different forms of visual storytelling to understand how and why filmmakers choose to tell their stories in certain ways. They will then use this knowledge to edit raw footage to show their understanding before editing a short film using all of the techniques they have learned.

ENGLISH LANGUAGE ARTS****Grade 8**

The standards define general, cross-disciplinary literacy expectations that must be met for students to be prepared to enter college and work force training programs ready to succeed. The K–12 grade-specific standards define end-of-year expectations and a cumulative progression designed to enable students to meet college and career readiness expectations no later than the end of high school.

Students advancing through the grades are expected to meet each year’s grade-specific standards, retain or further develop skills and understandings mastered in preceding grades, and work steadily toward meeting the more general expectations described by the standards.
